

The power amplifier S4200 is designed for meeting every standard for professional amplification. Its powder coated steel face plates and heavy-duty steel chassis reflect the manufacturing quality within.

Technical specification

Power output (1kHz, 1% THD)	4 x 200W / 4 Ohm 2 x 400W / 8 Ohm
Bridge	1V
Input sensitivity	20kOhm balanced
Input impedance	< 0,05%
THD (1kHz, -3dB)	20Hz – 20kHz
Frequency response (-3dB)	> 100 dB
Signal / Noise Ratio	> 104 dB
20Hz – 20kHz below rated power	signal limiter
“A” weighted	short-circuit
Protection	thermal
	DC protection
	overload
	load-mismatch
	variable speed fan
Cooling	
Connectors	balanced female XLR
Input	SPEAKON connectors
Output	power switch, gain control per channel
Controls	bridge switches
Indicators	green LED – POWER, SIGNAL
	red LED – LIMIT, PROTECT
	yellow LED - BRIDGE
Power requirements	230V AC 50Hz
Dimensions	483 x 88 x 278 mm / rack 2U
Weight	6 kg
